WhitePaper

## • **TOKEN INFORMATION:**

- **Network: Binance Smart Chain (BEP-20)**
- **Name: Peseta Token**
- **Symbol: PST**
- **Contract address: `0x12f5b3aea951ebd313ea802a1dbce2be9369cb93`**
- **Decimals: 9**
- **Total Supply: 10,000,000**
- **Fair Launch Time: 05/03/2022**
- **Liquidity Lock: Indefinitely**

## • INTRODUCTION:

- Introducing Peseta token, a project focused on renewable energy, with the biggest emphasis on solar energy.
- The renewable energy sector includes wind, hydraulic, tidal, biomass, solar and other sources.
- We have decided to take advantage of solar energy. On average, Spain alone enjoys approximately 2,500 hours of sunshine per year. This amount of sunshine makes Spain an ideal country to generate its own clean energy through solar panels and battery storage.
- Thus, we have decided to focus our project on improving the quality of our energy sources, to create a cleaner and more sustainable environment.

## • Fees

The following is a breakdown of the fees charged on each buy (6%) and sale (15%) transaction of the Peseta Token:

- 30% to the EShib Ecosystem (marketing + liquidity)
- 10% to donations for reforestation of the Euro Shiba Inu project
- 10% to ADEX (administrative expenses)
- 50% to Eco-Energy Investments

## • SECURITY:

- The liquidity of the Peseta Token is and will remain blocked indefinitely.
- A CERTIK audit is being carried out shortly to create more transparency and increase investor confidence in the project.

# ROADMAP

## Phase 1

- Smart Contract Launch
- Website Launch
- Twitter & Telegram Launch
- First Marketing Campaign

## Phase 2

- BuyBack
- First CEX Listing
- Second Cex Listing
- Third Cex Listing
- CoinGecko Listing
- 1k Holders

## Phase 3

- Certik KYC
- CoinMarketCap Listing
- Logo TrustWallet
- BSCscan Verification
- Second Marketing Campaign
- Partnerships with environmental and humanitarian aid non-profits
- First Donation

## Phase 4

- BuyBack \$PST & \$EShib
- Top 20 CEX Listing \$EShib
- Launch the first ESHIB EV charging station
- New Marketing Campaign
- 10K Holders
- Partnerships With Energy Companies

## • Utility:

- Our token was created to support the Euro Shiba Inu ecosystem.
- We will buy significant amounts of \$EShib and burn them, to reduce the number of tokens in circulation.
- We will continue to make weekly purchases of \$PST to maintain its price and liquidity pool on the exchanges.
- We will pay for marketing and listings on major exchanges, for both for \$PST and \$EShib.
- We will create our own wallet
- We will create our own CryptoBank, to assist large projects in developing the Metaverse.
- We will periodically make donations to non-profit organizations, focused on humanitarian aid and the fight against climate change.
- We will create strategic partnerships that will help us make progress in developing the Metaverse.

- Another key objective is the creation of a large environmental company, dedicated to the production of solar energy that offers electrical charging services for electric vehicles. This company will use our name and logo for marketing and brand recall.
- Investments in clean energy will help us make a significant contribution to fighting climate change and environmental sustainability.
- We will periodically report on progress and communicate our objectives to the investment community.
